SIME DARBY PROPERTY UNIVERSITY HACKATHON 2026 · PEOPLE TRACK

# Safe Edge.

The product language for a township water-edge safety service: five pass states, one typeface, and a screen that answers one question at a time.

SUPPORTING MATERIAL | DESIGN DOCUMENTATION | A4 · 15 PLATES

| | | |
|---|---|---|
| **Valid** | A pass is in force | 01 |
| **Expiring** | Ends within 30 days | 02 |
| **Suspended** | A safety item is missing | 03 |
| **Expired** | The pass ran out | 04 |
| **Unknown** | No pass, or not seen | 05 |

STATEMENT

# A calm system for a serious safety question.

Safe Edge helps a park team find a gap at the water edge, choose the fix that closes every way to the water, and prove the repair passes. The interface is built for a non-technical reader in a hurry.

The design system exists so that urgency never becomes noise. One question per screen. One primary action. State carried by shape as well as colour, so it survives glare, colour blindness and greyscale print.

> **“A missing fence is serious. The screen states the fact, the consequence and the next step, and never shouts.”**

## THE SYSTEM IN FIVE MARKS

Shape first. Colour second. Words always.

**Valid**
A pass is in force

**Expiring**
Ends within 30 days

**Suspended**
A safety item is missing

**Expired**
The pass ran out

**Unknown**
No pass, or not seen

01

# Foundations

A mineral-grey ground, solid off-white islands, and one dark park green that carries every action. The palette is restrained so that a pass state is the loudest thing on the screen.

**Colour** *04*

**Colour in state** *05*

**After dark** *06*

**Typography** *07*

**Layout, shape, depth** *08*

01.1 · PALETTE

# Three signal hues. One working green.

Pass states keep their own hues. Everything structural stays in the green-grey family, so red never has to compete for attention.

PRIMARY · ACTION

## Park Plate Green

#17302A
White text · 14.07:1

**Mineral Canvas**
#E7EBE8

**Island White**
#FBFCFB

**Raised White**
#FFFFFF

**Sunken Grey**
#EEF2EF

**Ink**
#1C2925

**Moss Grey**
#5D6B66

**Hairline**
#CFD6D2

**Field Edge**
#8E9994

**Lake Slate**
#AAB3AF

**Rail Green**
#24443B

SIGNAL PAIRS

**Valid** 4.92:1

**Expiring** 5.38:1

**Suspended** 5.48:1

**Expired** 5.05:1

**Unknown** 4.94:1

**The Solid Surface Rule.**

Cards, buttons, menus, bars and dialogs have solid fills. Nothing that holds text is transparent.

**One action green.**

Park Plate Green marks the one action that moves the case forward. It is dark enough for white text.

**Grey does the rest.**

Borders, captions and secondary text stay quiet, so the eye lands on state and action.

01.2 · PASS STATES

# Five states, five shapes.

Every state pairs a foreground and a tinted background, and always travels with its own shape mark. The words travel with it too.

## Valid

Filled dot
#237446 on #E3F1E8

● Valid to 20 Oct 2027

A pass is in force. The badge carries the date, so the colour does not have to.

## Expiring

Half ring
#94500E on #FBEEDD

◗ Expires in 12 days

Ends within 30 days, or a warning with a plan already in motion.

## Suspended

Square
#B02E28 on #FBE9E7

■ Paused since 06:42

A safety item is missing, or a route to the water is open.

## Expired

Slashed ring
#5B6763 on #ECEEED

⊘ Expired 04 Sep 2026

The pass ran out. The record stays visible.

## Unknown

Hollow ring
#5D6B66 on #EEF2EF

○ Not seen since 12 Oct

No pass yet, or the drone could not see. Never read as safe.

IN A RECORD

The mark, the words and the date travel together.

● Valid to 20 Oct 2027 Fence panel replaced and retested.

■ Paused since 06:42 Panel 4 missing; the pass is paused.

**The Shape-Carries-State Rule.**

A pass state is never shown by colour alone. Every mark has its own shape, and every badge also carries words. The system survives glare, colour blindness and a greyscale photocopy.

**The Calm Alarm Rule.**

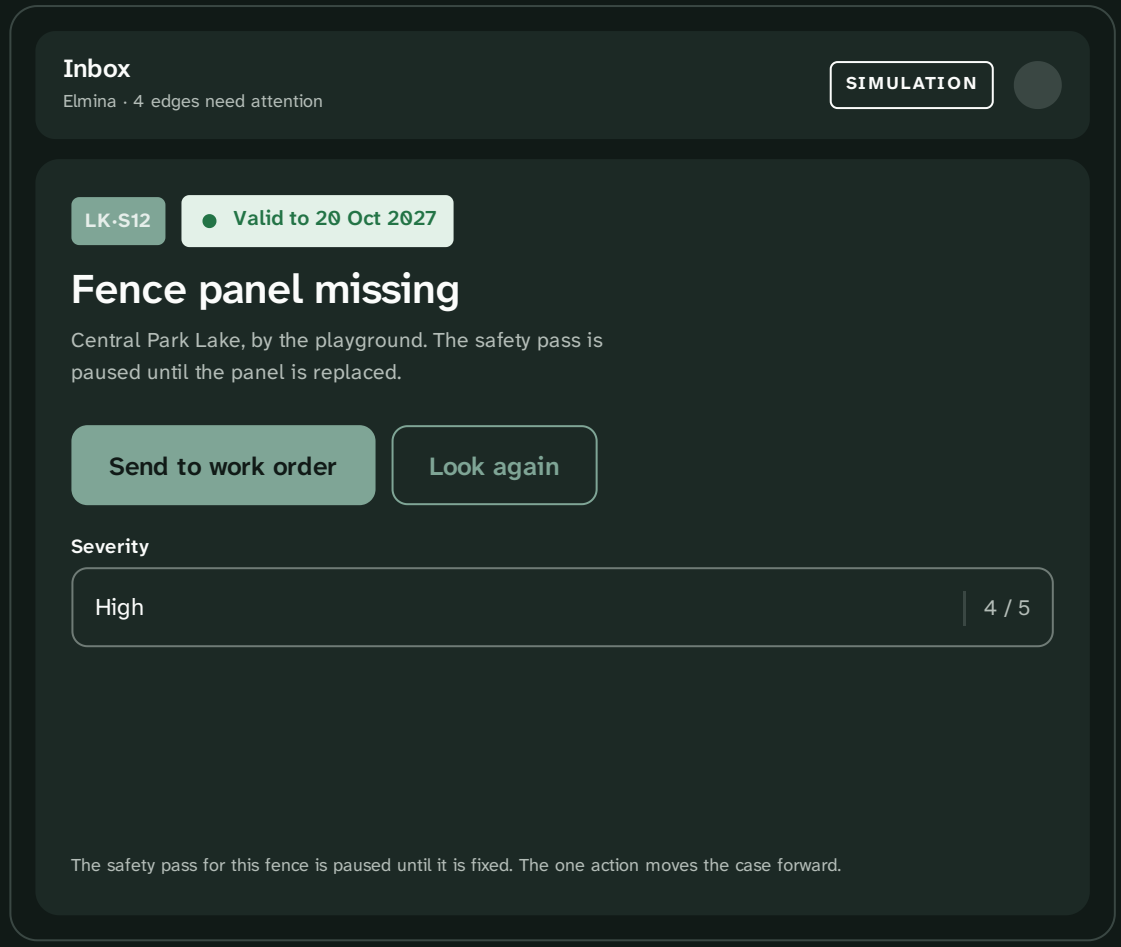

Red appears only where a safety item is missing, a route is open, or an action is destructive. Warnings with a plan already in motion use Expiring Amber.

01.3 · DARK MODE

# The same system, after dark.

Dark mode is a second rendering of the same tokens, not a second design. The canvas falls to near-black, islands lift one step, and the accent becomes pale sage so it can carry dark text.

| | | |
|---|---|---|
| **Mineral Canvas** #111A17 | page ground |
| **Island White** #1C2925 | surfaces |
| **Raised White** #24302C | inputs, chips |
| **Ink** #FBFCFB | primary text |
| **Park Plate Green** #7FA596 | accent, action |
| **Moss Grey** #B4BDB8 | secondary text |

**One accent, re-valued.**
Pale sage carries dark text at 6.52:1 on the dark canvas. The action stays the only filled button.

**Shadows stay rare.**
Islands still tile flat. Elevation appears only when a card floats over moving content such as the map.

**Same marks, same words.**
Every state mark and badge is unchanged. Only the token values move.

01.4 · TYPEFACE

# Aa

## Atkinson Hyperlegible Next

One humanist face, designed for low-vision readers. Similar characters (Il1, O0) stay distinct, and the letterforms hold up on a phone in sunlight.

400 500 600 700

READING SAMPLE

The dashboard never sets a paragraph wider than about 75 characters. On the phone, body text stays at 15 px and the pinned action bar keeps the one action in reach.

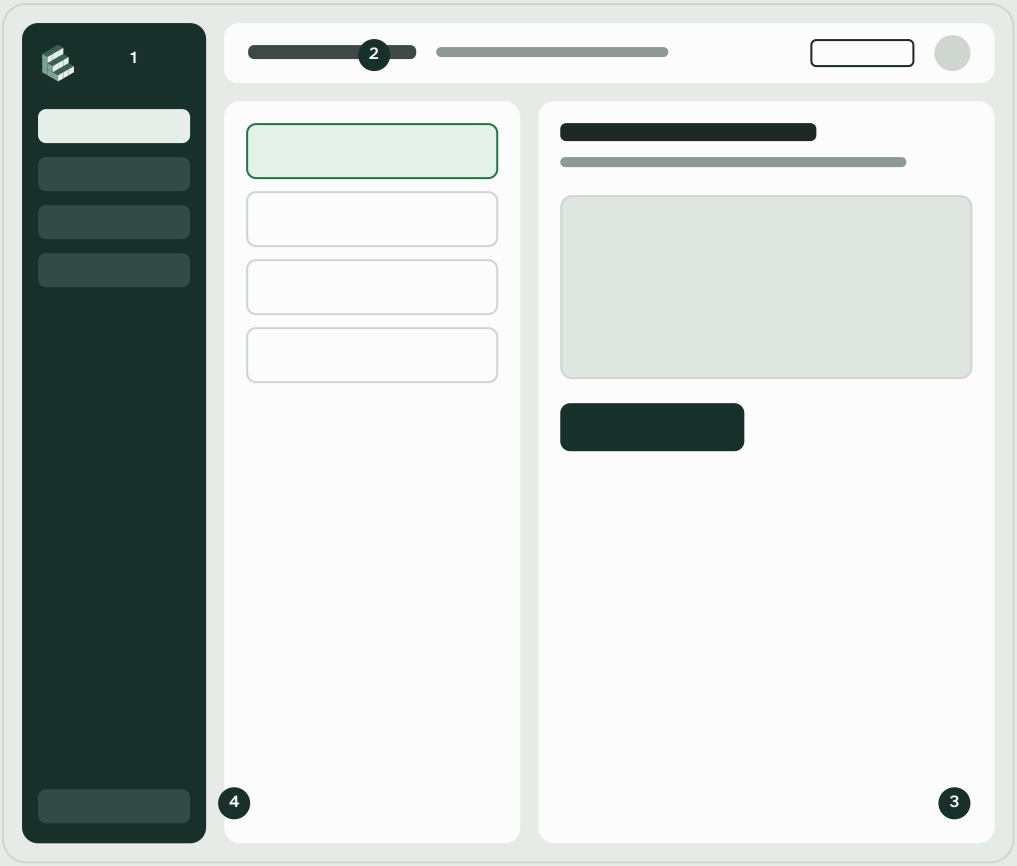

| | |
|---|---|
| DISPLAY<br>600 · 30 / 36 | Fence panel missing |
| H1<br>600 · 26 / 32 | Which fix closes every way? |
| H2<br>600 · 20 / 26 | 3 changes found |
| H3<br>600 · 16 / 22 | Why it matters |
| BODY<br>400 · 15 / 22 | A gap at the water edge, found on the last patrol. |
| BODY DENSE<br>400 · 14 / 20 | Checked 06:42 · Retention pond 3 |
| LABEL<br>500 · 14 / 20 | Send to work order |
| LABEL SMALL<br>500 · 12 / 16 | Photo: patrol, 12 Oct |
| OVERLINE<br>700 · 12 / 16 · 0.06em | SIMULATION |
| CODE PLATE<br>700 · 14 / 0.02em | LK·S12 |

**The 12 Pixel Floor Rule.**

No text is smaller than 12 px. Body lines stay under about 75 characters. Codes appear as small plates, never as page titles.

01.5 · SURFACE

## Islands on a mineral canvas.

1 232 px rail, 72 px collapsed
2 64 px top bar, SIMULATION
3 28 px island padding
4 12 px canvas and gutters
5 Phone 390 × 844, 16 px sides

SPACING · 4 PX STEPS

RADIUS

ELEVATION

GRID · 12 COLUMNS

12 px gutters. The work area fills the remaining width.

**The Flat Island Rule.**
Islands that tile the layout never carry a shadow. Depth comes from the canvas showing through the gutters.

**Targets.**
At least 44 px on phone, at least 32 px on desktop, and a 2 px focus ring on every focusable element.

**Borders.**
1 px hairlines. 1.5 px on outline buttons and the SIMULATION label. 2 px on focus and error only.

02

# Components

One action per screen, one shape per state, one set of parts that behave the same everywhere. The components below are rendered live, not drawn.

**Actions and fields** *10*

**Signature language** *11*

**Product screens** *12*

**Map and phone** *13*

02.1 · CONTROLS

# Parts that behave the same everywhere.

One primary button per screen. The negative action sits apart, in outline. A disabled control always says why it is disabled.

PRIMARY | SECONDARY | QUIET | DANGER | DISABLED | FOCUS

Send to work order | Look again | Back to Inbox | Not a problem | Send | Look again

Sending unlocks once Fix Lens has checked the fix. The disabled button keeps that reason beside it.

**Place name**

Central Park Lake

Plain names lead. Codes follow as small plates.

**Focused**

Central Park Lake

2 px focus border, accent caret.

**Pass / fail**

✓ Pass | ✕ Fail

The chosen side fills with its state tint.

**Measurement**

1.2 cm

The unit sits in its own segment inside the box.

**Error**

0.0 cm

Measure the gap again. It must be above 0 cm.

**Chip**

How sure: high | Photo attached

28 px tall, 4 px corners, hairline border.

ANATOMY · THE ACTION ROW

Primary first. Destructive last. The reason sits beside anything disabled.

Send to work order | Look again | Back to Inbox | Send | Not a problem

Sending unlocks once Fix Lens has checked the fix.

● Valid to 20 Oct 2027 | ☽ Expires in 12 days | ■ Paused since 06:42 | SIMULATION | LK·S12

A badge always carries its shape and its words. The SIMULATION label appears once per screen, in the top bar, and covers everything on that screen.

02.2 · THE MARKS

# State before colour.

Five pass states, each a different shape. The mark is the part that survives a greyscale print, a cracked screen and a glance from a moving vehicle.

**Valid**
Filled dot
12 / 18 px

**Expiring**
Half ring
12 / 18 px

**Suspended**
Square
12 / 18 px

**Expired**
Slashed ring
12 / 18 px

**Unknown**
Hollow ring
12 / 18 px

A ROW, AT WORK

Severity is a single ink dot. Size alone shows low, medium or high. Never colour.

THE TWO PLATES

LK·S12 SIMULATION

A code plate names a segment. It is never a page title. The SIMULATION label is the only place the word appears on a screen.

EVIDENCE FRAME

**Panel 4 missing**
Dashed red outline, red tag.
Photo: patrol, 12 Oct.

**One mark, one meaning.**
A shape is never reused for a different state, and a state is never drawn with a second shape.

**Words travel with it.**
Every badge names the state and its date or reason. Colour is the fastest cue, not the only one.

**Never decorative.**
The marks are functional. They appear only where a pass state is being reported.

03.1 · THE BUILT PRODUCT

# One question, one action, one proof.

Screens from the working build at 1440 × 900. Every screen carries the SIMULATION label once, in the top bar.

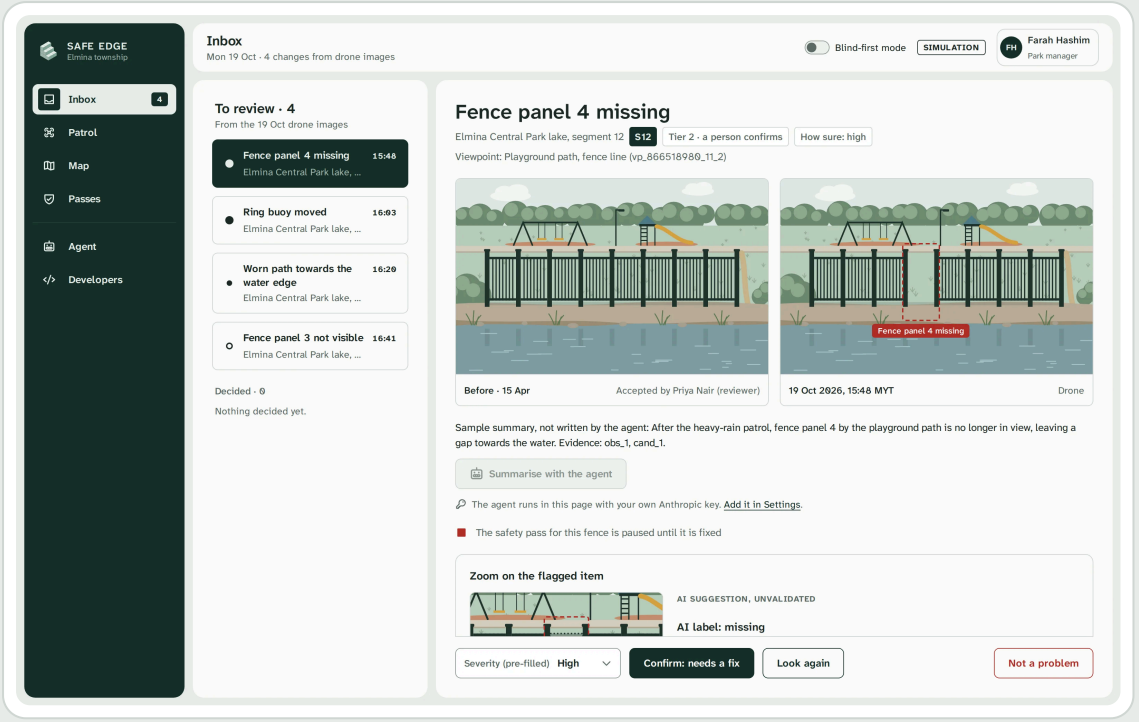

**PLATE A** Inbox. The list holds the decision; the detail island holds the evidence and the one primary action.

**Place first.** “Central Park Lake, by the playground” leads. LK·S12 follows as a plate.

**Facts, not alarm.** The state, the consequence and the next step sit in that order.

**One action.** “Send to work order” is the only filled button on the screen.

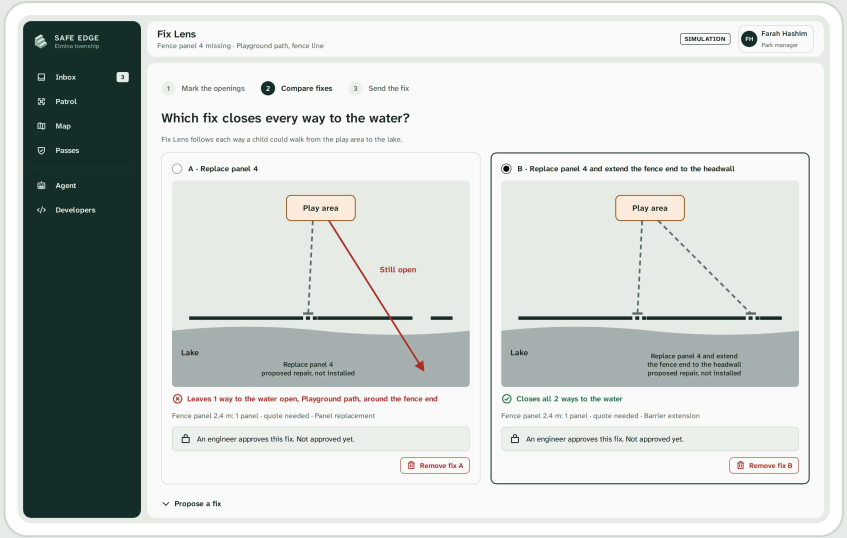

**PLATE B** Fix Lens. Each option is drawn to scale; blocked routes and open routes are labelled.

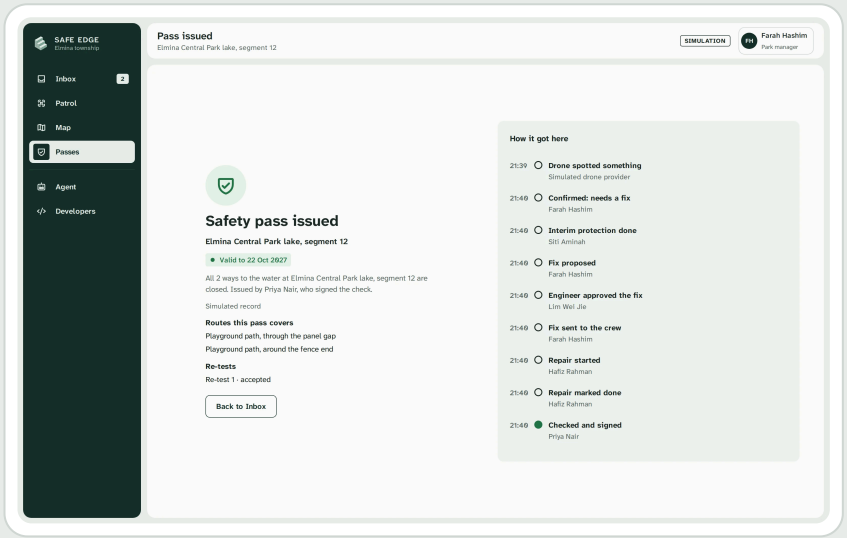

**PLATE C** Pass issued. The repair has been retested and the pass is in force.

03.2 · ACROSS SURFACES

# From the map to the phone.

The same tokens, the same state marks, one reading order. The phone is 390 × 844 with a pinned action bar.

PLATE D Map. The 3D scene is its own page. Its cards stay light in both modes because the scene draws its own day and night.

**Route, not decoration.**
The flag sits on the edge, the route follows the water, and the card names the place.

**One label.**
The SIMULATION mark stays on the map too. Records and images do not repeat it.

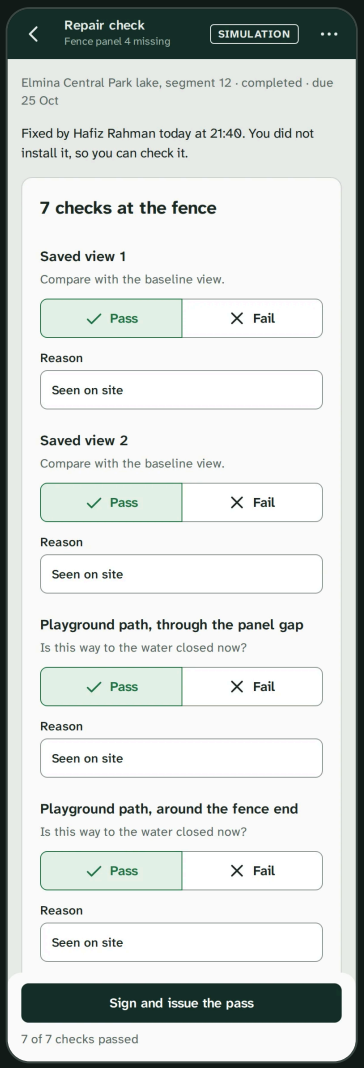

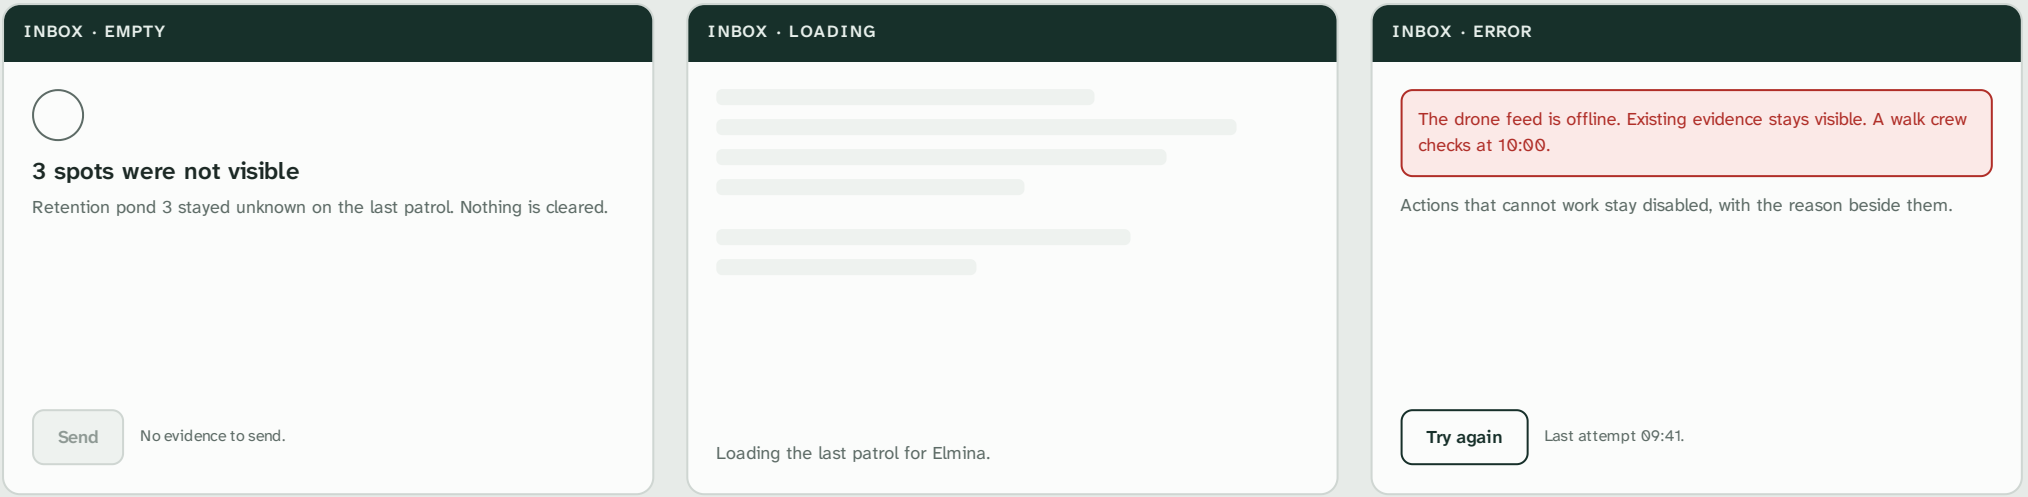

PLATE E
Retest on the phone. One full-width primary button, 44 px targets, a status line under it.

04.1 · HONESTY IN EVERY STATE

# Nothing is “all clear” unless it was seen.

Every screen ships empty, loading and error states, in Light and Dark. An empty screen never implies safe.

**Empty names the unknown.**
“3 spots were not visible” is honest. “All clear” would not be.

**Loading keeps the layout.**
Skeletons sit in the real rows, with one line that says what is loading.

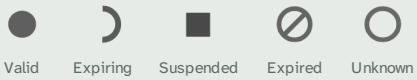

**Error keeps the evidence.**
The banner says what failed, what still works and what happens next.

CONTRAST · WCAG 2.2 AA

| PAIR | RATIO | AA |
|---|---|---|
| Ink on Island White | 14.66 | Pass |
| Moss Grey on Island White | 5.43 | Pass |
| Valid text on tint | 4.92 | Pass |
| Expiring text on tint | 5.38 | Pass |
| Suspended text on tint | 5.48 | Pass |
| Unknown text on tint | 4.94 | Pass |
| White on Park Plate Green | 14.07 | Pass |

Ratios computed from the token hex values in sRGB.

SHAPE SURVIVES GREYSCALE

The five marks stay distinct without hue. The words stay attached. That is the test every state must pass.

Body text stays at 12 px or larger. Targets are at least 44 px on phone. Motion respects **prefers-reduced-motion**.

READ, OPEN, TEST

# Everything here is live.

The album documents the system. The links below open the source file and the working prototype. Both were checked on 22 October 2026.
